List of Contents

NUMBER 1

B.J. Chen, Z.M. Xiao and **K.M. Liew**	1	A line dislocation interacting with a semi-infinite crack in piezoelectric solid
R. Bhargava, R.S. Agarwal, L. Kumar and **H.S. Takhar**	13	Finite element study of mixed convection micropolar flow in a vertical circular pipe with variable surface conditions
K. Farahani and **H. Bahai**	29	Hyper-elastic constitutive equations of conjugate stresses and strain tensors for the Seth–Hill strain measures
S.E. Bechtel, F.J. Rooney and **M.G. Forest**	43	Internal constraint theories for the thermal expansion of viscous fluids
T. Hayat, S. Nadeem and **S. Asghar**	65	Hydromagnetic couette flow of an Oldroyd-B fluid in a rotating system
A. Brillard and **J.-F. Ganghoffer**	79	Asymptotic behaviour of thin interphases within the large deformation case

NUMBER 2

J.N. Sharma, V. Pathania and **S.K. Gupta**	99	Circular crested waves in anisotropic thermoelastic plates bordered with inviscid liquid
T. Hayat, M. Khan and **M. Ayub**	123	On the explicit analytic solutions of an Oldroyd 6-constant fluid
J.N. Sharma and **M. Pal**	137	Rayleigh–Lamb waves in magneto-thermoelastic homogeneous isotropic plate
A.S. El-Karamany	157	Boundary integral equation formulation for the generalized micro-polar thermoviscoelasticity
L. Ma, L.-Z. Wu and **Z.-G. Zhou**	187	Dynamic stress intensity factors around two parallel cracks in a functionally graded layer bonded to dissimilar half-planes subjected to anti-plane incident harmonic stress waves
H. Demiray	203	The effect of a bump on wave propagation in a fluid-filled elastic tube
A.J. Chamkha	217	Unsteady MHD convective heat and mass transfer past a semi-infinite vertical permeable moving plate with heat absorption

NUMBERS 3–4

A.C. Eringen	231	Electromagnetic theory of microstretch elasticity and bone modeling

doi:10.1016/S0020-7225(04)00241-1

H.S. Takhar, A.J. Chamkha and **G. Nath**	243	Effect of thermophysical quantities on the natural convection flow of gases over a vertical cone
W. Lee, H. Shin and **Y.-H. Yoo**	257	Revisited criterion to prevent kinking of a crack out of a bi-material interface under the presence of in-plane residual stresses—a global approach
Z.-Q. Cheng and **J.N. Reddy**	271	Green's functions for an anisotropic thin plate with a crack or an anticrack
A. Hanyga and **L. Jianfei**	291	Thermal effects in immiscible two-fluid porous flow
G. Akgün	303	Amplitude modulation of waves in an elastic tube filled with a layered fluid
Y.Z. Chen	325	Stress analysis of a cylindrical bar with a spherical cavity or rigid inclusion by the eigenfunction expansion variational method
Th. Seelig, N. Broedling and **D. Gross**	339	Modeling microstructural evolution by rearranging point defects in elastic media
M. Kumari and **G. Nath**	353	Non-Darcy mixed convection in power-law fluids along a non-isothermal horizontal surface in a porous medium
S. El-Borgi, F. Erdogan and **L. Hidri**	371	A partially insulated embedded crack in an infinite functionally graded medium under thermo-mechanical loading
V.A. Papathanasopoulou, D.I. Fotiadis and **C.V. Massalas**	395	A theoretical analysis of surface remodeling in long bones
A. Ramanathan and **G. Suresh**	411	Effect of magnetic field dependent viscosity and anisotropy of porous medium on ferroconvection

ISSUES 5–6

J.D. Clayton, D.L. McDowell and **D.J. Bammann**	427	A multiscale gradient theory for single crystalline elastoviscoplasticity
E. Smith	459	A theoretical analysis of a process zone at the tip of a tapered crack
E. Smith	473	A comparison of Mode I and Mode III results for the elastic stress distribution in the immediate vicinity of a blunt notch
E. Smith	483	A comparison of the Modes I and III elastic stress distributions near a circular cylindrical notch

L. Yang, J. Ren, Y. Song, J. Min and **Z. Guo**	491	Convection heat transfer enhancement of air in a rectangular duct by application of a magnetic quadrupole field
A.-R.A. Khaled and **K. Vafai**	509	Hydromagnetic squeezed flow and heat transfer over a sensor surface
X. Wang and **Z. Zhong**	521	Interaction between a semi-infinite crack and a straight dislocation in a decagonal quasicrystal
X. Wang and **H.L. Dai**	539	Magnetothermodynamic stress and perturbation of magnetic field vector in an orthotropic thermoelastic cylinder
A.V. Kuznetsov, A.A. Avramenko and **P. Geng**	557	Analytical investigation of a falling plume caused by bioconvection of oxytactic bacteria in a fluid saturated porous medium
V.C. Loukopoulos and **E.E. Tzirtzilakis**	571	Biomagnetic channel flow in spatially varying magnetic field
H.H. Sherief, F.A. Hamza and **H.A. Saleh**	591	The theory of generalized thermoelastic diffusion
X.Y. Chen, K.C. Toh, J.C. Chai and **C. Yang**	609	Developing pressure-driven liquid flow in microchannels under the electrokinetic effect
	623	Erratum

ISSUE 7

F. Labropulu and **M. Chinichian**	625	Unsteady oscillatory stagnation-point flow of a viscoelastic fluid
Z. Huang	635	On nonlocal residuals and fluctuations
A.S. El-Karamany and **M.A. Ezzat**	649	Thermal shock problem in generalized thermo-viscoelasticty under four theories
Z. Qian, F. Jin, Z. Wang and **K. Kishimoto**	673	Dispersion relations for SH-wave propagation in periodic piezoelectric composite layered structures
D.S. Dugdale	691	Stability of a floating cylinder
C.-H. Chen	699	Combined heat and mass transfer in MHD free convection from a vertical surface with Ohmic heating and viscous dissipation

Y. Chen and **B. Li**	715	Symbolic computation and construction of soliton-like solutions to the (2+1)-dimensional dispersive long-wave equations
A.D. Kirwan Jr.	725	Intrinsic photon entropy? The darkside of light
S. Das, B. Patra and **L. Debnath**	735	On elastodynamical problem of interfacial Griffith cracks in composite media

ISSUES 8–9

M. Romeo	753	Electromagnetoelastic waves at piezoelectric interfaces
S.D. Akbarov and **A.N. Guz**	769	Axisymmetric longitudinal wave propagation in pre-stressed compound circular cylinders
J.K. Chen, J.E. Beraun and **C.L. Tham**	793	Ultrafast thermoelasticity for short-pulse laser heating
H. Tianhu, S. Yapeng and **T. Xiaogeng**	809	A two-dimensional generalized thermal shock problem for a half-space in electromagneto-thermoelasticity
K. Mansouri, D. Sadaoui and **B. Fourcher**	825	The effects of inlet temperature frequency on the quasi-steady approach of periodic conjugated heat transfer problem
J.D. Lee and **Y. Chen**	841	Electromagnetic wave propagation in micromorphic elastic solids
X. Liu and **G. Hu**	849	Inclusion problem of microstretch continuum
S. Li and **G. Wang**	861	On damage theory of a cohesive medium
J.K. Du, Y.P. Shen, D.Y. Ye and **F.R. Yue**	887	Scattering of anti-plane shear waves by a partially debonded magneto-electro-elastic circular cylindrical inhomogeneity
A.M. Blokhin, R.S. Bushmanov and **V. Romano**	915	Asymptotic stability of the equilibrium state for the hydrodynamical model of charge transport in semiconductors based on the maximum entropy principle
P.S. Datti, K.V. Prasad, M. Subhas Abel and **A. Joshi**	935	MHD visco-elastic fluid flow over a non-isothermal stretching sheet
	947	Correspondence
	949	Corrigendum
	951	Corrigendum

ISSUE 10

	iii	Publisher's note
R.K. Deka and **H.S. Takhar**	953	Hydrodynamic stability of viscous flow between curved porous channel with radial flow
D.A. Prikazchikov and **G.A. Rogerson**	967	On surface wave propagation in incompressible, transversely isotropic, pre-stressed elastic half-spaces
Y. Chen and **J.D. Lee**	987	Multiscale modeling of polycrystalline silicon
L. Palese and **A. Georgescu**	1001	On instability of the magnetic Bénard problem with Hall and ion-slip effects
M. Hjiaj, Z.-Q. Feng, G. de Saxcé and **Z. Mróz**	1013	On the modelling of complex anisotropic frictional contact laws
T.K.V. Iyengar and **V. Geetha Vani**	1035	Oscillatory flow of a micropolar fluid generated by the rotary oscillations of two concentric spheres
M. Mabrouk and **A. Boughammoura**	1061	Homogenization of a degenerate parabolic problem in a highly heterogeneous periodic medium
	1097	Corrigendum

ISSUES 11–12

M. Kumari and **G. Nath**	1099	Unsteady MHD film flow over a rotating infinite disk
P.M. Jordan and **C. Feuillade**	1119	On the propagation of harmonic acoustic waves in bubbly liquids
B.L. Wang and **Y.G. Sun**	1129	Intensity factors for some common piezoelectric fracture mechanics specimens with conducting cracks or electrodes
Z.-G. Zhou, B. Wang and **Y.-G. Sun**	1155	Two collinear interface cracks in magneto-electro-elastic composites
C.W. Soh	1169	Symmetry reductions and new exact invariant solutions of the generalized Burgers equation arising in nonlinear acoustics
B.-j. Wu, Y.-h. Zheng, Y.-g. You, X.-y. Sun and **Y. Chen**	1193	On diffraction and radiation problem for a cylinder over a caisson in water of finite depth
S. Li	1215	On dual conservation laws in planar elasticity

R. Nazar, N. Amin, D. Filip and **I. Pop**	1241	Unsteady boundary layer flow in the region of the stagnation point on a stretching sheet
P.-F. Hou and **A.Y.T. Leung**	1255	A spheroidal inclusion in an infinite magneto-electro-elastic material
G.K. Midya	1275	On Love-type surface waves in homogeneous micropolar elastic media
M.C.C. Cunha, M.M. Santos and **J.E. Bonet**	1289	Buckley–Leverett mathematical and numerical models describing vertical equilibrium process in porous media
S. Özer and **E. Şuhubi**	1305	Equivalence transformations for first order balance equations

ISSUES 13–14

B.J. Chen, Z.M. Xiao and **K.M. Liew**	1325	A screw dislocation interacting with a finite crack in a piezoelectric medium
C.-F. Gao and **N. Noda**	1347	Thermal-induced interfacial cracking of magnetoelectroelastic materials
W.Q. Chen, K. Yong Lee and **H.J. Ding**	1361	General solution for transversely isotropic magneto-electro-thermo-elasticity and the potential theory method
B. Uma and **R. Usha**	1381	Interfacial phase change effects on the stability characteristics of thin viscoelastic liquid film down a vertical wall
Z.C. Ou and **Y.H. Chen**	1407	Near-tip stress fields and intensity factors for an interface crack in metal/piezoelectric bimaterials
M. Khenner	1439	Enhancement of epitaxial lateral overgrowth by vapor-phase diffusion
Marcos, C. Yang, T.N. Wong and **K.T. Ooi**	1459	Dynamic aspects of electroosmotic flow in rectangular microchannels
F. Périn	1483	Bounds and asymptotic results for the effective viscosity of a nondilute suspension of oriented fibres in longitudinal flow
M.A. Ezzat	1503	Fundamental solution in generalized magneto-thermoelasticity with two relaxation times for perfect conductor cylindrical region
A. Hanyga	1521	Two-fluid porous flow in a single temperature approximation

ISSUES 15–16

D.J. Hasanyan, L. Librescu and **D.R. Ambur**	1547	A few results on the foundation of the theory and behavior of nonlinear magnetoelastic plates carrying an electrical current
A. Baksi, R.K. Bera and **L. Debnath**	1573	Eigen value approach to study the effect of rotation and relaxation time in two dimensional problems of generalized thermoelasticity
R. Singh and **K. Thomas Jacob**	1587	Solution of transport equations in a mixed conductor—a generic approach
Z.-B. Kuang, Z.-D. Zhou and **K.-L. Zhou**	1603	Electroelastic analysis of a piezoelectric half-plane with finite surface electrodes
H.J. Keh and **C.H. Huang**	1621	Slow motion of axisymmetric slip particles along their axes of revolution
R.G. Chowdhury and **B.N. Mandal**	1645	Motion due to ring source in ice-covered water
J.N. Sharma, M. Pal and **D. Chand**	1655	Three-dimensional vibration analysis of a piezothermoelastic cylindrical panel
J.H. Chang and **J.F. Li**	1675	Evaluation of asymptotic stress field around a crack tip for Neo–Hookean hyperelastic materials
H. Demiray	1693	On the existence of some evolution equations in fluid-filled elastic tubes and their progressive wave solutions
R.A. Chaudhuri	1707	Three-dimensional asymptotic stress field in the vicinity of the circumferential tip of a fiber–matrix interfacial debond
E.S. Şuhubi	1729	Equivalence groups for balance equations of arbitrary order—Part I

ISSUES 17–18

W.B. Zimmerman	1753	On the resistance of a spherical particle settling in a tube of viscous fluid
T.A. Angelov	1779	Variational analysis of a rigid-plastic rolling problem
H.-J. Shim and **J.-H. Kang**	1793	Free vibrations of solid and hollow hemi-ellipsoids of revolution from a three-dimensional theory
M. Kumari and **G. Nath**	1817	Transient MHD rotating flow over a rotating sphere in the vicinity of the equator

E. Smith	1831	The elastic stress distribution near the root of an elliptically cylindrical notch subjected to mode III loadings
E. Smith	1841	The elastic stress distribution near a circular cylindrical notch due to external dislocations
S.D. Akbarov and **R. Kosker**	1847	Internal stability loss of two neighbouring fibers in a viscoelastic matrix
M. Pakdemirli and **A.Z. Sahin**	1875	Group classification of fin equation with variable thermal properties
A. Pantokratoras	1891	Further results on the variable viscosity on flow and heat transfer to a continuous moving flat plate
M. Svanadze	1897	Fundamental solution of the system of equations of steady oscillations in the theory of microstretch elastic solids
X. Wang	1911	Eshelby's problem of an inclusion of arbitrary shape in a decagonal quasicrystalline plane or half-plane
R.E. Jones	1931	Models for contact loading and unloading of a rough surface
H. Tian-hu	1949	Lagrange multiplier method of the general variational principles of finite deformation theory of couple stress and its application in the strain gradient plasticity

ISSUES 19–20

D. Ieşan and **R. Quintanilla**	1957	On the plane strain of thermo-microstretch elastic solids
P. Ravindran, J.M. Krishnan and **K.R. Rajagopal**	1973	A note on the flow of a Burgers' fluid in an orthogonal rheometer
